

To Whom It May Concern:

I feel that an injustice would be committed if the FM translator stations (K-LOVE) were pulled from the air in favor of LPFM for the following reasons;

- 1) K-LOVE is a station that we can listen to with no fear of what will be heard, some of the material heard on commercial stations is objectional to say the least, and replacing the station that has become the most widely listened to station in this area for we who choose to raise the standards of our environment and that of our children.
- 2) K-LOVE to us is a bastion of values that we accept as ours, and to have that taken away for more of the same type of listening as offered by the commercial stations is in contravention with the premise of Freedom Of Choice, what freedom is there if there is no choice?
- 3) Finally, I feel that in meeting the criteria of In the Public Interest, should you not consider the public as a whole instead of select groups? I feel that it would be a disservice to the public interest to limit the choices of radio listening genera that is presently offered.

Thank You for your time
